DoctorClean® Specializes in hand hygiene

WHO: SAVE LIVES - Clean Your Hands - No action today; no cure tomorrow

It is known to all that many viruses and germs are spread by hands contact, wherever and whenever people touch things, there's a risk to get an infection.

After the outbreak of Covide-19, following the latest recommendations of the World Health Organization (WHO), it's better to equip all entrances of public places with a hand disinfectant dispenser to ensure the public infection control & hygienic, like hospital, shopping centre, school, office, etc.

Even though the pandemic has highlighted the importance of good hand hygiene, we have long been partnering with people to equip them with hand hygiene solutions for different industries and applications. Touchless dispensers are also more user-friendly, and have been proven to positively influence hand hygiene behaviour of medical staff. The touchless technology in the dispenser reduces the risk of cross-contamination. The refillable bottle type allows the firm to easily source sanitizer from different manufacturers, ensuring supply security for infection protection even during times of high demand.

Ningbo Changqi is the first hand sanitiser dispenser manufacturer in China to enter the cleaning and disinfection industry, have the patent of modular design, which help save the maintenance time and cost.

The brand DoctorClean® dispensing systems are designed to provide an effective and convenient

method of hand cleaning to help people to avoid such risk in daily life and stay healthy.

An often underestimated component to an ideal dispenser system is touchless operation.

The automatic sensor technology has two decisive advantages. It's not only effectively prevents cross-contamination, but also demonstrably improves hand hygiene. Studies show that automatic hygiene dispensers can increase hand disinfection by up to 50 percent per patient each day.

Touch Free Dispensing System

- Touch free , safer and hygienic.
- Patented modularization design, easy for operation & maintenance.
- Flexible nozzle design, drop, spray & foam optional suits for a variety of liquid, gel soap and disinfectant.
- Bottle/disposable bag optional.
- Low power consumption, battery life $\geq 150,000$ cycles.
- Optional local design.
- CE certified.
